## Eco Pots and Planters by Sandcastle Products

# 2010

Handcrafted Hyper Tufa planter pots

### Chauvin Gardens Presents - Eco Pots

Eco Pots are handcrafted by local Alberta artists using Hypertufa.

Hypertufa is a lightweight eco friendly concrete which is used to create unique one of a kind, old world charm, stone planters.

They are available in 8", 10" and 12" rounds, 8", 10", and 12" squares, and several rectangular shapes.

Plants simply thrive in eco pots..

The wicking action of hypertufa allows water to rebound into the

growing media from the planter/pot. This reduces plant stress on those very hot days.

The hypertufa allows air exchange into the growing media for root uptake which is essential for good plant growth. Plant roots indeed do breathe oxygen.

The thermal mass of the pot allows the roots to remain cooler on those ugly hot days.

... they simply look great with a thriving plant in them...

They also make a great gift idea.

### 12" Round Planter Insert

The 12" round pots easily accept standard 12" round plastic pots.

**Old world charm, each uniquely handcrafted.**

No two eco pots are the same. Each varies in texture, color and texture gradients and shape. Add individuality to your plantscapes.

Echo pots are made using hypertufa light weight eco friendly concrete.

All pots are hand laid using a constant internal form for the design basis.

Potted up rectangular filled with stuffers

12" basket liner for table or garden display

Come visit Chauvin Gardens and look for yourself.

## VARIOUS SHAPES

### From Rounds to Square to Rectangular Shapes

Selections include 8", 10" and 12" rounds, rounds to accept standard plastic pots as liners; 8", 10" and 12" squares; various rectangular shapes.

# ECO POTS AND PLANTERS

by: Sandcastle Products

Each pot and planter has its own identity.

Hand laid round ones ( like above), form laid round ones. Deep ones to shallow ones. Smooth texture to

course texture.

To square form laid ones ( like above ) to hand laid rectangles and

squares. Deep ones to shallow ones. Smooth texture to course texture.

Colors and gradients .... no two are the same.

Each pot or planter is handcrafted by Alberta Artisans.

Hypertufa is:

- Extremely strong and resilient.
- Extremely plant friendly. They provide an incredible growing environment for plants. Far better than plastic, ceramic, concrete or glass.
- Extremely Eco friendly. All natural organic materials. Very earth friendly.
- Extremely light weight. Some pieces are feather light.

Real old world charm & warmth ..for sure. The organic look ... for sure. Something different and quaint .... for sure.

Want your plantscape to look old and established well moss the pots up. ( Come in and check with us how easy this is to do. ) It's personal some

people adore the look some don't.

After all ... we are individuals as well !!!

Come on in and check out our eco pots and planters for yourself. We can

even pot them up for you.
